STAMPING PARTS AND ASSEMBLIES.

Mechanicals presses from 100tn to 315 tn.

Mecánica J. Parente is a family-run business specialized in tool manufacturing and metal stamping, with an experience harking back to 1970.

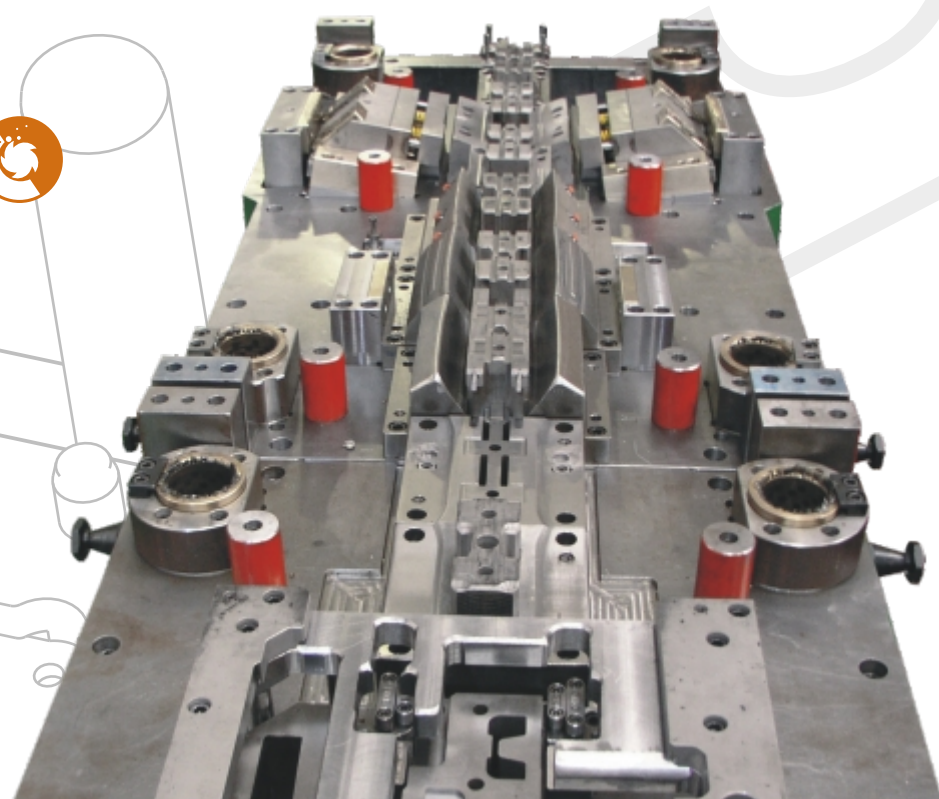

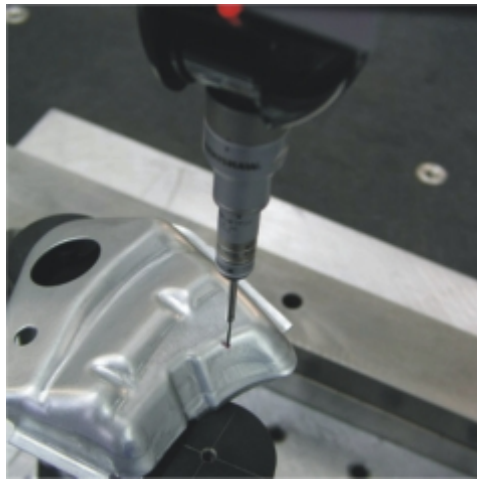

Our products are aimed at various markets, though chiefly at the automotive field, for which we manufacture a wide range of pieces.

With a staff of 25 workers, we handle, upon receipt of the piece's blueprint from the client, the whole manufacturing process, either at our premises or outside, including painting, coating, thermal treatments, etc., always aiming to deliver to the client the product entirely finished and ready for assembly.

To do so, we have a wide range of machinery that perfectly covers all the needs of the products we manufacture here.

QUALITY CONTROL

All our manufacturing processes are performed under close and permanent control.
